

# HORACIO MORAN

JUNIOR FULL STACK DEVELOPER

## P R O F I L E

Horacio has worked as a barista in fast paced environments for over 5 years, but it is time for a greater challenge.

He is a tech enthusiast, and it is the curiosity that drives him. A few months ago, he taught himself some HTML, CSS and JavaScript and he found his passion, which made him take the decision to quit his job to begin the exciting journey to become a software developer. He is currently studying at Coder Academy Sydney to pursuit his goal to be employed as full stack developer where he can contribute and be constantly challenged.

## P R O J E C T S

### PORTFOLIO WEBSITE

HTML | CSS | JavaScript

I created a portfolio website which presents me as a developer. The purpose was to provide information about me, my skills, interests and showcase my work.

I experienced a few challenges working with CSS, especially when I had to align elements the way I wanted.

### RUBY TERMINAL APP

Ruby | Gems | CLI

I designed, implemented, and tested a terminal application with Ruby. The requirements were to accept user input in the form of text input and to produce printed output. I built an interactive café app for ordering takeaway beverages. The user, after selecting the desired beverages would be shown a receipt with list items and the total amount. It was a challenging task, but it was a nice feeling to receive a great comment on the UI, features and receipt functionality from one of the educators.

## T E C H S T A C K

- HTML5 CSS3 SASS Bootstrap

- JavaScript jQuery

- Ruby Rails PostgreSQL

### PROJECTED

- ReactJS MongoDB Express JS

- NodeJS

## T O O L S

- VS Code GitHub Trello

- Heroku AWS draw.io

## S K I L L S

- Problem solving Teamwork

- Responsible

## MARKETPLACE APP

Ruby | Rails | PostgreSQL | Bootstrap | Heroku | AWS | Stripe

I designed, built, and deployed a full stack two-sided marketplace application with Ruby on Rails where a user can create an account and log into it using Devise. Users can list their cars for sale and buy other users' cars securely with the use of Stripe payment system. Each user's data, such as cars images are stored in AWS S3.
